

# Your resort and hospitality digital ordering partner.

EZ-Chow enhances the dining experience at your establishment by providing unparalleled convenience for your patrons and staff. Our custom, enterprise digital ordering solutions enable your customer to easily place their order, whether from the beach, golf course/cart, at the pool or simply on their way back from a day trip.

Food orders are injected directly into your POS and sent automatically to the kitchen printers, with the destination printed on the ticket. For example, Cart 24 out on the golf course, or Cabana 16 at poolside or even Umbrella 9 in the hotel beach area.

The checkout page is designed to reflect your specific business requirements.

## Options for food pickup include:

- Dine-In
- Carry Out
- Delivery

Your staff will know exactly where to deliver the order. Through the use of QR codes (on golf carts, pool side seating, beach umbrellas, etc), beacon technology or other unique identifiers, like room numbers.

## Payment options are customizable:

- credit card\*
- pay at pickup
- bill to room
- house account

*\* (we will integrate with your existing credit card processor)*

## Additional benefits:

1. Decreased volume of phone call orders
2. Increased order size
3. Improved order accuracy
4. Happy guests that won't miss a minute of fun!

Our Integration POS partners are listed below – if you don't see your POS listed, give us a call!

## We also have an on-premise solution:

Now available for Symphony 2 POS systems, enabling secure hosting in our environment or yours.
